

EVOLUTION AND COGNITION LAB

1 PY151 research credit for participating in an
experiment investigating:

Visualizing data in more than three dimensions

IRB # 12-29

The purpose of this study is to better understand how individuals comprehend information in hyper dimensional space. With your participation in this web-based questionnaire survey, you can experience how psychologists study internalized object representation in novel environments and obtain a better understanding of how psychological surveys are constructed.

This web-based study will take about 20 minutes. Participants will receive 1 PY151 research credit and will have the chance to **win additional \$40**. You must be 16 years and older to participate in this study. Students who are subject to animation-induced seizures are disqualified from participating in this project.
