

# EVOLUTION AND COGNITION LAB

1 PY151 research credit for participating in an  
experiment investigating:

## **Survey of risk perception in past and present environments**

IRB #11-22

The purpose of this study is to better understand how individuals assess the inherent risks in their living environment and how risk perceptions affect risk-taking behavior. With your participation in this web-based questionnaire survey, you can experience how psychologists study human risk taking and obtain a better understanding of how psychological surveys are constructed. Note that this survey includes questions pertaining to sexual violence.

This web-based study will take about 1 hour. Participants will receive 1 PY151 research credit.
