

# EVOLUTION AND COGNITION LAB

1 PY151 research credit for participating in an  
experiment investigating:

## **Survey of risk taking attitudes**

IRB # 11-05

The purpose of this study is to better understand how individuals view risky behaviors in various areas of everyday life and how their risk propensity relates to various demographic variables. With your participation in this web-based questionnaire survey, you can experience how psychologists study human risk taking and obtain a better understanding of how psychometric surveys are constructed.

This web-based study will take about 1 hour. Participants will receive 1 PY151 research credit.
